Pulsafeeder Expertise

Technology is the key to delivering responsible products to the markets that we serve. Leading the way in the development of metering technologies, Pulsafeeder continues to set the standard for accuracy, reliability and safety. Innovation is another hallmark of Pulsafeeder. Helping customers find a new approach to an old problem is what we do best.

Model Specific QR Code

Pulsafeeder assists everyone in the field with information for THAT SPECIFIC PRODUCT, quickly and easily. No dedicated app needed. Simply use your QR Reader on your smart phone or tablet and scan the QR Code located on the Pulsafeeder product label, either Pump or Controller.

- Identify - Model Number, Serial number, KOPkit (Repair Kit)
- View - Quickly find product information such as parts list, IOM, tech sheet and more
- Contact - Call or email Tech Support immediately to assist you
- Email - Send this information to yourself or someone else, to save or even view later

Cooling Tower Controller Technology

Pulsafeeder’s line of Cooling Tower Controllers are designed for simplicity and reliability. Offering affordable, high performance MicroVision and MicroTrac Controllers are specifiable and intuitive. Pulsafeeder Cooling Tower Controllers provide you the control of your cooling tower system, with the ability to accurately control the level of dissolved solids, conductivity, makeup, corrosion inhibitor, biocide chemicals, feed inhibitor and much more. With multiple control options available in Pulsafeeder Cooling Tower Controllers we are sure to have a unit to fit your Cooling Tower needs.

Toroidal Sensor Technology

Featuring innovative toroidal sensor technology, the MicroVision and MicroTrac Cooling Tower controllers provide an economical control platform that is not susceptible to sensor fouling and never requires calibration! The toroidal conductivity sensor is factory calibrated for the life of the probe eliminating routine calibrations which saves you valuable service time and money. By design, Pulsafeeder’s toroidal conductivity sensor features no exposed electrodes this eliminates cleaning of the sensor, downtime, and erroneous conductivity readings. When installed according to the manufacturer’s instructions, the need for routine sensor removal and cleaning is virtually eliminated.

Standard Sensor Specifications

- Maximum Temperature: 122°F / 50°C
- Temperature Compensation Range:
  32°F - 122°F / 0°C - 50°C
- Maximum Pressure: 125 PSI (8.6 BAR)
- Sensor Type: Toroidal
- Cable Length, Standard: 15’ / 4.5 m
- Cable Length, Maximum: 750’ / 228.6 m
- Materials of Construction: Virgin Polypropylene
Features & Benefits

**Simple Programming**
- Soft keys touch pad programming
- Intuitive menus make program adjustments easy & understandable

**Easy Installation and Easy to Use**
- Pre-wired and conduit connection options make easy installation
- Large graphical display
- LED function indicators
- Touch pad program keys provide clear and precise system information

**Toroidal Probe**
- No calibration required
- Reduced potential for fouling
- Factory calibrated

**Heavy Duty Enclosure**
- NEMA 4X rated
- Easy Installation

---

**MicroTrac Features & Benefits**

**Timers**
- Water meter pulse timer
- Percent timer
- % Post bleed timer
- Limit timer

**Selectable Set Point**
- Rising
- Falling
- Open or closed loop control

---

**MicroVision Features & Benefits**

**Selectable Timers**
- Limit
- Percent
- % Post bleed with limit
- Water meter
- Dual biocide timers

**Outputs**
- 4-20 mA isolated analog
- Dry contact alarm
- Bleed (Solenoid valve or motorized ball valve)

**Digital Inputs**
- Flow switch
- 3 Drum level
- Dry contact water meter
- Hall effect
MicroTrac Cooling Tower Controller

The MicroTrac is a microprocessor based feed and bleed, toroidal conductivity controller designed to control conductivity and feed inhibitor in cooling tower systems. Featuring innovative toroidal sensor technology, the MicroTrac provides an economical control platform that is not susceptible to sensor fouling and never requires calibration!

The MicroTrac measures the conductivity of the cooling tower recirculating water via a toroidal conductivity sensor. The controller activates two independent relay outputs based on bleed and a selectable feed mode of operation. The MicroTrac conductivity controller has a 0 - 9,999 μS/cm range, making it ideal for other applications as well, such as rinse, industrial process, wastewater, etc.

**Controller Specifications**
- Enclosure: NEMA 4X / IP65
- Dimensions: 6.44 x 3.2 in (163 x 82 mm)
- Power Supply: 90 VAC / 50/60Hz / 5A; 250 VAC / 50/60Hz / 5A
- Control Output: Line Voltage @240VA per Relay (2 Amps @ 120VAC)
- Display: LCD
- Set Point Range: 0 – 9,999 μS/cm
- Set Point Differential (Hysteresis): Fixed 5% below the set point

**Flow Switch Specifications**
- Max. Temp: 122°F (50°C)
- Max. Pressure: 125 PSI (8.6 BAR)
- Activate Flow Rate: Approximately 1 GPM / 3.78 LPM
- Materials of Construction: PVC and Glass filled Polypropylene

**Typical Applications**
- Comfort Cooling Process
- Industrial Cooling
- Rinse
- Industrial Process
- Wastewater

---

**MicroTrac Diagram**

- LCD Display
- Up/Down Buttons
- Bleed μS
- Set Point
- Feed
- Conduit or Pigtails
- Liquid Tite for Sensor Installation
- Menu

MicroVision Cooling Tower Controller

The MicroVision is a microprocessor-based toroidal conductivity controller with selectable timer and dual biocide control. Designed specifically for cooling tower applications, MicroVision comes standard with the features and functions you need for accurate monitoring and control of cooling tower water. The MicroVision is a full function controller in a compact package that won’t break your budget!

**Controller Specifications**
- Enclosure: NEMA 4X / IP65
- Dimensions: 6.44 x 3.2 in (163 x 82 mm)
- Power Supply: 90 VAC / 50/60Hz / 5A; 250 VAC / 50/60Hz / 5A
- Control Output: 5 Amps max
- Display: LCD
- Set Point Range: 0 – 9,999 μS/cm
- Languages: English, Spanish, Portuguese

**Flow Switch Specifications**
- Max. Temp: 122°F (50°C)
- Max. Pressure: 125 PSI (8.6 BAR)
- Activate Flow Rate: Approximately 1 GPM / 3.78 LPM
- Materials of Construction: PVC and Glass filled Polypropylene

**Typical Applications**
- Comfort Cooling Process
- Industrial Cooling
- Rinse
- Industrial Process
- Wastewater

---

**Diagram**

- LCD Display
- Up/Down Buttons
- Soft Keys
- Conduit or Pigtails
- Bleed
- Feed
- Biocide A
- Biocide B
- Liquid Tite for Sensor Installation
System Options

**Flow Assembly**
Optional
- 125 psi max
- Available with or without panel

**Standard Panel and Flow Assembly**
Optional
- Flow Assembly per mounted on poly panel
- Quick, simple installation

**Panel Mounted with Pumps**
Optional
- **MicroTrac, Panel & Flow Assembly** includes 1 pump mount, in/out ball valves, strainer, inj. tee & rails
- **MicroVision, Panel & Flow Assembly** includes from 1 to 3 pump mount(s), strainer, sensor tee, inj. tee(s) & rails
MicroTrac Typical Installation

Typical Installation Includes:

• Solenoid Valve
• Water Meter
• Isolation Valves
• Metering Pumps

All Available from Pulsafeeder!

MicroVision Typical Installation
Parts & Accessories

PULSAtron Series Electronic Metering Pumps
The PULSAtron Series A Plus and E Plus electronic metering pumps can be used with the MicroVision and MicroTrac Series controller for timer based chemical metering.

CHEM-TECH Series Peristaltic Metering Pumps
The CHEM-TECH Series XP and XPV peristaltic metering pumps can be used with the MicroVision and MicroTrac Series controller for timer based chemical metering.

Coupon Racks
Designed to provide reliable, convenient side stream monitoring using ASTM standard coupons. These rugged systems can be configured for up to six monitoring stations.

Contacting Head Water Meters Multi-Jet Meters
3/4 in. to 2 in., are designed for use in conjunction with a pulse timer to proportionally control pumps, valves etc. The Multi-Jet chamber of the water meter assures accuracy over a wide range of flows with low head loss.

Solenoid Valves - Cooling Tower Applications
Solenoid Valves for use in your cooling tower application.
